NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31 MARCH 2020

**1. Corporate Information**

Enkay Converged Technologies LLP (LLPIN – AAJ-8489) was incorporated on 30th June, 2017 as a Limited Liability Partnership ('LLP'). The registered office of the company is located at Arvind Limited Premises, Naroda Road, Ahmedabad - 380025.

The Company has got dealership of video conferencing units of CISCO and digital / IP EPABX of Alcatel including data networking products. The Company is selling its CISCO products through its holding company – Arvind Limited – Telecom Division and Alcatel products through Arvind Limited – Telecom Division as well as its distribution network.

**2. Statement of Compliance and Basis of preparation**

**2.1 Compliance with Ind AS**

The financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") as issued under the Companies (Indian Accounting Standards) Rules, 2015.

**2.2 Historical Cost Convention**

The financial statements have been prepared on a historical cost basis, except for the followings:

- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments);
- Defined benefit plans – plan assets measured at fair value;
- Value in Use

**2.3 Rounding of amounts**

The financial statements are presented in INR and all values are rounded to the nearest rupee as per the requirement of Schedule III, except when otherwise indicated.

### 3. Summary of Significant Accounting Policies

The following are the significant accounting policies applied by the LLP in preparing its financial statements:

#### 3.1. Current versus non-current classification

The LLP presents assets and liabilities in the Balance Sheet based on current/non-current classification.

An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

#### Operating cycle

Operating cycle of the LLP is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. As the LLP's normal operating cycle is twelve months.

#### 3.2. Use of estimates and judgements

The estimates and judgements used in the preparation of the financial statements are continuously evaluated by the LLP and are based on historical experience and various other assumptions and factors (including expectations of future events) that the LLP believes to be reasonable under the existing circumstances. Difference between actual results and estimates are recognised in the period in which the results are known / materialised.

The said estimates are based on the facts and events, that existed as at the reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date.

#### 3.3. Foreign currencies

The LLP's financial statements are presented in INR, which is also the LLP's functional currency.

#### Transactions and balances

Transactions in foreign currencies are initially recorded by the LLP's functional currency rates at the date the transaction first qualifies for recognition.

#### 3.4. Fair value measurement

The LLP measures financial instruments such as Investments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

*M. S. G.*

- In the principal market for the asset or liability
- Or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the LLP.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The LLP uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the LLP determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

### 3.5. Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of Property, plant and equipment are required to be replaced at intervals, the LLP recognises such parts as individual assets with specific useful lives and depreciates them accordingly. All other repair and maintenance costs are recognised in profit or loss as incurred.

#### **Derecognition**

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

*MS. G.*

## Depreciation

Depreciation on property, plant and equipment is provided on the straight line method over useful lives of the assets as prescribed under Part C of Schedule II to the Companies Act 2013 except for Plant and Machinery other than Lab equipment and Leasehold Improvements.

When parts of an item of property, plant and equipment have different useful life, they are accounted for as separate items (Major Components) and are depreciated over their useful life or over the remaining useful life of the principal assets whichever is less.

Depreciation on Plant and Machinery other than Lab equipment is provided on straight line basis over the useful lives of the assets as estimated by management based on internal assessment. The management estimates the useful lives as follows:

Assets	Useful Life
Plant & Machinery	10 Years
Vehicles	10 Years
Office Equipment	5 Years
Computers	3 Years

The management believes that the useful life as given above best represent the period over which management expects to use these assets. Hence the useful lives for these assets are different from the useful lives as prescribed under Part C of Schedule II to the Companies Act 2013.

Depreciation for assets purchased/sold during a period is proportionately charged for the period of use.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

### Transition to Ind AS

On transition to Ind AS, the LLP has elected to measure all items of property, plant and equipment at cost eligible under Ind AS 16 less accumulated amortisation and accumulated impairment losses, if any.

### 3.6. Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that the LLP incurs in connection with the borrowing of funds.

### 3.7. Inventories

Inventories of Stock-in-trade are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- Traded goods: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on moving weighted average basis.

*MS-G*

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

### 3.8. Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the LLP and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The LLP has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks.

#### Sale of goods

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, which generally coincides with dispatch. Revenue from export sales are recognized on shipment basis. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable net of returns and allowances, trade discounts and volume rebates.

#### Interest income

For all financial instruments measured at amortised cost and interest-bearing financial assets classified as fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). The EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset.

### 3.9. Financial instruments – initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### a) Financial assets

##### (i) Initial recognition and measurement of financial assets

All financial assets, except investment in subsidiaries and joint ventures, are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial assets.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

##### (ii) Subsequent measurement of financial assets

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost
- Financial assets at fair value through other comprehensive income (FVTOCI)
- Financial assets at fair value through profit or loss (FVTPL)

*M.S.G.*

- **Financial assets at amortised cost :**

A financial asset is measured at amortised cost if:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows, and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

- **Financial assets at fair value through other comprehensive income**

A financial asset is measured at fair value through other comprehensive income if:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Financial assets included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the LLP recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI financial asset is reported as interest income using the EIR method.

- **Financial assets at fair value through profit or loss**

FVTPL is a residual category for financial assets. Any financial asset, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

After initial measurement, such financial assets are subsequently measured at fair value with all changes recognised in Statement of profit and loss.

### **(iii) Derecognition of financial assets**

A financial asset is derecognised when:

- the contractual rights to the cash flows from the financial asset expire, or
- The LLP has transferred its contractual rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the LLP has transferred substantially all the risks and rewards of the asset, or (b) the LLP has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

*M.S.L.*

#### **(iv) Impairment of financial assets**

In accordance with Ind-AS 109, the LLP applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18

The LLP follows 'simplified approach' for recognition of impairment loss allowance on:

- Trade receivables or contract assets resulting from transactions within the scope of Ind AS 18, if they do not contain a significant financing component
- Trade receivables or contract assets resulting from transactions within the scope of Ind AS 18 that contain a significant financing component, if the Company applies practical expedient to ignore separation of time value of money, and

The application of simplified approach does not require the LLP to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the LLP determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events on a financial instrument that are possible within 12 months after the reporting date.

#### **b) Financial Liabilities**

##### **(i) Initial recognition and measurement of financial liabilities**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate.

All financial liabilities are recognised initially at fair value minus, in the case of financial liabilities not recorded at fair value through profit or loss, transaction costs that are attributable to the issue of the financial liabilities.

The LLP's financial liabilities include trade and other payables, loans and borrowings from related parties.

*MPK*

**(ii) Subsequent measurement of financial liabilities**

The measurement of financial liabilities depends on their classification, as described below:

- **Financial liabilities at fair value through profit or loss**

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

- **Loans and Borrowings**

This is the category most relevant to the LLP. After initial recognition, interest-bearing borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to borrowings.

**(iii) Derecognition of financial liabilities**

A financial liability (or a part of a financial liability) is derecognised from its balance sheet when, and only when, it is extinguished i.e. when the obligation specified in the contract is discharged or cancelled or expired.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

**c) Offsetting of financial instruments**

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

**3.10. Cash and cash equivalent**

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the LLP's cash management.

*MEB*

### 3.11. Taxes

Tax expense comprises of current income tax and deferred tax.

#### **Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Current income tax relating to items recognised outside Statement of profit and loss is recognised outside Statement of profit and loss. Current income tax are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

#### **Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

*M.C.*

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside Statement of profit and loss is recognised outside Statement of profit and loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The Company recognizes tax credits in the nature of MAT credit as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which tax credit is allowed to be carried forward. In the year in which the Company recognizes tax credits as an asset, the said asset is created by way of tax credit to the Statement of profit and loss. The Company reviews such tax credit asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period. Deferred tax includes MAT tax credit.

### **3.12. Earnings per share**

Basic EPS is calculated by dividing the profit / loss for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

Diluted EPS is calculated by dividing the profit / loss attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

### **3.13. Provisions**

#### **General**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

*MS-61*

#### 4. Significant accounting estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

##### 4.1. Estimates and assumption

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

##### **Fair value measurement of financial instruments**

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions relating to these factors could affect the reported fair value of financial instruments. See Note 25 for further disclosures.

##### **Allowance for uncollectible trade receivables**

Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowances for estimated irrecoverable amounts. Estimated irrecoverable amounts are based on the ageing of the receivable balance and historical experience.

##### **Taxes**

Deferred tax assets are recognised for unused tax credits to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

##### **Property, plant and equipment**

Refer Note 3.5 for the estimated useful life of Property, plant and equipment. The carrying value of Property, plant and equipment has been disclosed in Note 5.

##### **Impairment of non-financial assets**

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable

amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

## Terms and conditions of transactions with related parties

1) Transaction entered into with related party are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances, at the year-end are unsecured and settlement occurs in cash.

**Enkay Converged Technologies LLP**  
Notes to the Financial Statements

**Note 25 : Fair value disclosures for financial assets and financial liabilities**

The management assessed that the fair values of cash and cash equivalents, other bank balances, trade receivables, other financial assets and trade payables approximate their carrying amounts largely due to the short-term maturities of these instruments.

The management assessed that fair values for loan from holding company would approximate their carrying values. This is due to the interest rates for similar loan have not changed significantly as at March 31, 2020, as compared to the interest rates at which such loan have been availed.

The management assessed that the fair values of cash and cash equivalents, other bank balances, trade receivables, other current financial assets, trade payables and other current financial liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values

The fair value of borrowings and other financial liabilities is calculated by discounting future cash flows using rates currently available for debts on similar terms, credit risk and remaining maturities.

**Note 26 : Financial instruments risk management objectives and policies**

The LLP's principal financial liabilities, comprise borrowings and trade & other payables. The main purpose of these financial liabilities is to finance the LLP's operations and to support its operations. The LLP's principal financial assets include trade and other receivables and cash & short-term deposits that derive directly from its operations.

**(a) Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include borrowings, deposits, Investments, trade and other receivables, trade and other payables and derivative financial instruments.

**Interest rate risk**

Interest rate risk arises from the sensitivity of financial assets and liabilities to changes in market rates of interest. The LLP has not hedged its interest rate risk.

**Foreign Currency risk**

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The LLP transacts business in local currency. The LLP does not have foreign currency trade payables and receivables etc. and is, therefore, not exposed to foreign exchange risk.

**(b) Credit risk**

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The LLP is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks, foreign exchange transactions and other financial instruments. The LLP monitors its credit exposure to its counterparties via their credit ratings (where applicable) and through its policy, thereby limiting its exposure to any one party to ensure there is no significant concentration of credit risk.

**(c) Liquidity risk**

Liquidity risk is the risk that the LLP may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The LLP's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The LLP closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including bilateral loans, debt and overdraft from both domestic and international banks at an optimised cost. It also enjoys strong access to domestic capital markets across equity.

## Enkay Converged Technologies LLP

### Notes to the Financial Statements

The table below summarises the maturity profile of the LLP's financial liabilities based on contractual undiscounted payments:

Particulars	DUE IN YEAR 0 TO 1		DUE IN YEAR 1 TO 2		DUE IN YEAR 3 TO 5		TOTAL AMT. RS IN LACS
						YEARS	
<b>Year ended March 31, 2020</b>							
Interest bearing borrowings	2,767.48						2,767.48
Trade payables	467.25						467.25
	<b>3,234.73</b>	<b>0.00</b>	<b>0.00</b>	<b>0.00</b>	<b>0.00</b>	<b>0.00</b>	<b>3,234.73</b>
<b>Year ended March 31, 2019</b>							
Interest bearing borrowings	1,784.00						1,784.00

	<b>2,572.61</b>	<b>0.00</b>	<b>0.00</b>	<b>0.00</b>	<b>0.00</b>	<b>0.00</b>	<b>2,572.61</b>

### Note 27 : Capital management

For the purpose of the LLP's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the LLP. The primary objective of the LLP's capital management is to ensure that it maintains an efficient capital structure and healthy capital ratios in order to support its business and maximise shareholder value.

The LLP manages its capital structure and makes adjustments to it in light of changes in economic conditions or its business requirements. To maintain or adjust the capital structure, the LLP may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The LLP monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The LLP includes within net debt, interest bearing loans and borrowings less cash and short-term deposits (including other bank balance).

Particulars	Rs. in Lacs

Enkay Converged Technologies LLP  
Notes to and Forming Part of the Financial Statements for the year ended 31 March 2020

Note 28 : Disclosure Pursuant to Employee Benefits

A. Defined Contribution Plans:

Particulars	Rs. in Lacs	
	Year ended March 31, 2020	Year ended March 31, 2019
Provident Fund	43.79	30.77
	43.79	30.77

The Company makes Provident Fund contributions to defined contribution plans for qualifying employees. Under the schemes, the company is required to contribute a specified percentage of the payroll costs to fund the benefits.

B. Defined Benefit Plans:

This is an unfunded defined benefit plan for qualifying employees. Gratuity shall be payable to an employee on termination of employment due to superannuation, retirement or resignation after successful completion of vesting period. The completion of vesting period is not applicable in the case where termination of employee is due to death.

The Major Categories of Plan Assets of the Fair Value of the Total Plan Assets of Gratuity are as follows:

Particulars	Year ended March 31, 2020	Year ended March 31, 2019
Insurance Fund	100%	100%
(%) of total plan assets	100%	100%

The Principal Assumptions used in Determining above Defined Benefit Obligations for the Company's plans are shown below:

Particulars	Year ended March 31, 2020	Year ended March 31, 2019
-------------	---------------------------	---------------------------

*Handwritten signature*

Discount Rate	5.76%	6.96%
Future Salary Increase	10.00%	10.00%
Expected rate of return on Plan Assets	N.A.	N.A.
Attrition Rate	N.A.	N.A.
Rate of Employee Turnover	18.00%	18.00%
Mortality Rate during Employment	Indian Assured Lives Mortality (2006-08)	Indian Assured Lives Mortality (2006-08)
Mortality Rate after Employment	N.A.	N.A.

A Quantitative Sensitivity Analysis for Significant Assumption is as shown below:

Particulars	Sensitivity level	(Increase) / Decrease in Defined Benefit Obligation (Impact)	
		Year ended March 31, 2020	Year ended March 31, 2019
<b>Rs. in Lacs</b>			
<b>Gratuity</b>			
Discount Rate	1% increase	(1.56)	(0.84)
	1% decrease	1.72	0.93
Salary Increase	1% increase	1.64	0.89
	1% decrease	(1.52)	(0.83)
Change in rate of Employee Turnover	1% increase	(0.91)	(0.55)
	1% decrease	0.96	0.58

The followings are the expected future Benefit payments for the Defined Benefit Plan:

Particulars	Rs. in Lacs	
	Year ended March 31, 2020	Year ended March 31, 2019
<b>Gratuity</b>		
Within the next 12 months (next annual reporting period)	0.33	0.15
Between 2 and 5 years	12.59	5.56
Beyond 5 years	27.10	17.17
<b>Total Expected Payments</b>	<b>40.01</b>	<b>22.87</b>

Weighted Average duration of Defined Plan Obligation (based on discounted cash flows)

Particulars	Year ended March 31, 2019	
	Years	Years
Gratuity	7.00	8.00

The followings are the expected contributions to Planned Assets for the next year:

Particulars	Year ended March 31, 2020	
	Rs. in Lacs	
Gratuity	26.31	
	22.62	

**C. Other Long Term Employee Benefit Plans**

**Leave Encashment**

Salaries, Wages and Bonus include Rs. 37.15 Lacs (Previous Year Rs. 38.72 Lacs) towards provision made as per actuarial valuation in respect of accumulated leave encashment/compensated absences.

**Enkay Converged Technologies LLP**  
**Notes to and Forming Part of the Financial Statements for the year ended 31 March 2020**

**Note 29 : Note on COVID 19 Pandemic**

The spread of COVID-19 has severely impacted businesses around the globe including India following lockdowns, causing extended shut down of businesses offering non-essential goods & services, disruptions in public transportation and local/domestic travel, supply chain, travel plans, and other emergency measures.

The Company offers Converged Technology solutions in domains of Enterprise Communications, Network Infrastructure, AV integration & Automation and security & Surveillance. The business of the Company has also been affected by this disruption. Shut down of E Commerce, BPOs , Malls, Hospitality , Airlines, Manufacturing industries etc. for extended periods of time are expected to have continuing effect at least for the next two quarters based on current assessment.

The Company has made detailed assessment of the liquidity position for the next one year and of the recoverability and carrying value of its assets comprising Property, Plant and Equipment, Right of Use Assets, Intangible Assets, Trade Receivables, Inventory as at balance sheet date and has made appropriate adjustments along with adjustment to revenue recognition and actuarial assumptions. In assessing the recoverability of its assets including receivables and inventories, the Company has considered internal and external information up to the date of approval of these financial statements including economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets. The impact of the global health pandemic may be different from that estimated as at the date of approval of these financial statements. However, the impact assessment of COVID-19 is a continuing process given the uncertainties associated with its nature and duration. The Company will continue to closely monitor any material changes to future economic conditions.
